LGBIO2060: Guidelines Project 3

Simon Vandergooten - Clémence Vandamme

December 2, 2021

1   Introduction

This last project will be dedicated to the reading of a paper (you can choose between four papers available on Moodle), you are asked to answer questions related to modeling practices. Each paper is focusing on a specific topic such as decision making, feedback control, bayesian MLE and learning.

2   Guidelines

- If you did not watch it already during practical session, you can watch the following video, by accessing it **here**, done by the team of Neuromatch academy about the modeling practices.

- Choose one of the four paper available on Moodle based on your topic preference and read it.

- Make a summary of the paper (between half a page and a page).

- Answer the following questions:

    1. What is the research question ?
    2. Which model is used ? Why is it appropriate and how does it respond to the question ?
    3. What are the ingredients of the model ? What are the hypotheses needed to use it ?
    4. What are the limitations of this model ?
    5. What criticism do you have of this article? Both on the content and the form.

- It should not be more than 2 pages in total.

3   Deadline

The project must be submitted on Moodle before the **16 December 23:59**.
Your PDF must be named as follows : *LGBIO2060_Projet3_Grxx*.
